

# ONEEKA WILLIAMS, MD

NEWSLETTER • SPRING 2015

In 2012, the Girl Scouts Research Institute published GENERATION STEM, a comprehensive evidence based study that examined what girls were saying about Science, Technology, Engineering and Math.

The study found that 80% of girls are interested in STEM careers, but only 13% of them will choose it as a career and only 20% who matriculate as a STEM major in college will graduate.

*“This book is extremely educational with a lot of good science.”*

## Dr. Williams Third Book Now Available NEW BOOK! Dr. Dee Dee Dynamo's Saturn Surprise

**A BOOK SERIES THAT ENCOURAGES CHILDREN'S INTEREST IN SCIENCE & STEM CAREERS**

Harvard-educated medical doctor and active practicing surgeon Dr. Oneeka Williams continues on her mission to promote literacy and science education with her third book in the *Dr. Dee Dee Dynamo* children's book series. *Dr. Dee Dee Dynamo's Saturn Surprise* completes the SPACE SCIENCES trilogy of her series, and the next trilogy of books will focus on ENVIRONMENTAL SCIENCES, with *Dr. Dee Dee Dynamo's Beemore Breakthrough* coming out in the summer of 2015.

A strong advocate for STEM education for girls and minorities as well as for literacy and diversity in children's literature, Dr. Williams speaks frequently and has been honored for her creative and innovative way to bring science to girls and underrepresented minorities.

### Dr. Williams Delivers Keynote Speech at Girl Scouts STEM Conference

As the keynote speaker at the Girl Scouts of Eastern Massachusetts third annual STEM Conference and Expo on March 15, Dr. Williams shared her personal journey and encouraged girls to “Dream and Dream Big!”

*“STEM careers earn more, and as women are increasingly becoming more heads of households this creates greater flexibility, financial freedom, economic empowerment and overall health for them and their children. Girls need to see more examples of women in STEM fields and how having a career in a STEM field can fulfill all of the things that many of us identify as important.”*

**You Can Help The Cause by Donating Dr. Dee Dee Books to Disadvantaged Children**—The books in Dr. Williams series are available online and at select bookstores and libraries. You can also donate books to disadvantaged children through the Dr. Dee Dee Dynamo Book Donations Program in partnership with First Book ([www.firstbook.org](http://www.firstbook.org)) a respected nonprofit that provides access to new books for children in need. Please visit the website at [www.droneeka.com](http://www.droneeka.com) for more info.

**Sponsoring Dr. Dee Dee Event**—Schools and other organizations can sponsor events such as *Dr. Dee Dee Dynamo Day* and feature Dr. Williams as a keynote speaker at conferences, conventions and other kinds of special events.

**COMING SOON!**

Dr. Dee Dee Dynamo's Environmental Science Series!

SUMMER RELEASE:  
Book 4

*Dr. Dee Dee Dynamo's Beemore Breakthrough*

The crops on the Island of Positivity have suffered because of a decline in the bee population. Join Dr. Dee Dee and the team as they make a beeline to a solution and learn more than you can imagine about bees!!!

*Dr. Dee Dee Dynamo's Saturn Surprise* is an illustrated color book for children from ages 6-12. It is Common Core aligned and include a glossary, learning words, discovery questions and a math challenge.

**Such a fun way to learn about science and astronomy**—“*Dr. Dee Dee Dynamo's Saturn Surprise* by Oneeka Williams M.D. is such a fun way to learn about science and astronomy. This book is beautifully illustrated with bright and vivid colors and bold print. It is a great education tool for children who are interested in science and space. It promotes helping others while learning about space.

Once you open the book it is a real page turner and it keeps on until the last page. I recommend this book to everyone but it is geared toward the ages of 6 through 12 years old.

This book would make a great gift to give. It would look good in your child's library or in any library's bookshelf. I look for more great books by Oneeka Williams.”

Coco's Book Reviews

**Dee Dee Dynamo's Saturn Surprise is a fun, educational adventure which introduces science and problem solving**—“*Dr. Dee Dee Dynamo's Saturn Surprise* is a fun, educational adventure which introduces science and problem solving to the readers. I loved that the author included a glossary of terms as well as a pronunciation guide. There are also Mommy Dynamo's Discovery Questions in which the readers can be quizzed about what they learned in this adventure story. I highly recommend this book for any school or family library.”

Amazon.com—Reviewed by Kathy Nelson

**Great Teaching Tool**—“Each book created by author Oneeka Williams is one that will teach your child more in the reading of her book than they could possibly learn sitting in on an astronomy class.”
